TO: EACH SUPERVISOR

FROM: P. MICHAEL FREEMAN

***UPDATE NUMBER 2 ON THE WILLIAMS FIRE***

The following is an update to my presentation before your Honorable Board this morning.

The fire continues to grow at approximately 600 acres an hour. The fire has consumed 12,000 acres and there is a fire front of 11 miles above the Cities of Glendora, San Dimas, La Verne and Claremont. Current conditions along the front country have provided for effective structural protection and no further structure loss has occurred.

The fire has reached the slopes above the San Gabriel Reservoir on the west and is beginning to reach the ridge above San Antonio Canyon to the east. Evacuation plans have been prepared for the Baldy Village area in the event it becomes necessary.

Thank you for allowing me the opportunity to make a personal presentation to you this morning and for your generous offer for assistance.

If you have any questions regarding the above, please let me know.
